1. Quick Start (5-Minute Guide)

When you open the portal, you'll land on the **Students** page. This is your starting point for everything.

The Students page — your starting point. Search by name or email, then click a student to open their workspace.

The screenshot displays the 'Students' page of the D-VIVID CONSULTANT portal. At the top, there's a header with the D-VIVID logo, a 'Students' tab, and a 'DC' indicator. Below the header, the 'Students' section shows '9 students total' and a '+ New Applicant' button. A search bar is provided with the placeholder 'Search by name or email...'. The main content area lists 9 students, each with a unique ID, name, email, location, and application status. Each student entry includes a '1 App' button and a 'Delete' link.

ID	Name	Email	Location	Apps	Action
KM	Kunj Modh	kunj.demo@example.com	India	1 App	Delete
TU	Test User	test.user@dvidid.student		1 App	Delete
SS	shivang singh	shivang.singh@dvidid.student	India	1 App	Delete
SS	shivang singh	shivangsingh516@gmail.com		1 App	Delete
US	Unapproved Student	unapproved.1789134494628@test.com		1 App	Delete
PT	Phase33 TestStudent	phase33.1789134494375@test.com		3 Apps	Delete
US	Unapproved Student	unapproved.1789134488462@test.com		1 App	Delete
PT	Phase33 TestStudent	phase33.1789134488089@test.com		3 Apps	Delete
BS	Benchmark Student33A	benchmark-33a-1789132799147@dvidid.test	India	1 App	Delete

Getting Started in 5 Steps

1. Click **+ New Applicant** (top right)
2. Fill in student details + first university application
3. Complete the intake (required sections only)
4. Click **+ Add Document** → choose type → enter prompt
5. Click **Generate Document** → wait → edit → approve → download

2. The 4-Step Workflow

Every page shows a progress tracker at the top. It tracks your journey through 4 steps:

Step	What you do	Where
1. Applicant	Create the student profile	Students → + New Applicant
2. Application	Complete intake info (education, motivation, career goals)	Application workspace → Intake
3. Document	Create a document (SOP, Essay, Visa SOP, etc.) and generate	Application workspace → + Add Document
4. Review	Edit, approve, and export the final document	Document workspace

Tip

The tracker is clickable — completed steps link back to their pages so you can navigate freely.

1 Create an Applicant

Click **+ New Applicant** on the Students page. You'll see a form with two sections:

New Applicant page — fill in student details and their first university application in one go.

D-VIVID CONSULTANT

Students

DC

1 Applicant 2 Application 3 Document 4 Review

Students / New Applicant

New Applicant

Create a student and their first university application. You'll upload the CV and complete the intake in the application workspace.

1. Student Details

The person whose application materials are being prepared.

Cancel Create Applicant & Application →

Section 1: Student Details

- **First Name** and **Last Name** — required
- **Email** — required, used to identify the student
- **Phone** and **Country** — optional but recommended

Section 2: First Application

- **University** — type to search (required)
- **Program** — e.g. "MS Machine Learning" (required)

- **Degree** — MS, MEng, MA, MBA, PhD, Bachelor, or Other (required)
- **Department, Country, Intake, Intake Year** — optional

What happens next

Click **Create Applicant & Application** →. You'll be automatically redirected to the Application Workspace where you complete the intake, create documents, and generate.

Tip

You can add more applications for the same student later from their student workspace page.

Student Workspace — after creating an applicant, you'll see their profile card and all their applications.

2 Complete the Application Intake

After creating an applicant, you land on the **Application Workspace**. The status box shows what information is missing:

Application Workspace — the central hub. The status box shows missing required answers with a direct link to complete them. When ready, it shows "✓ Applicant information ready".

The screenshot shows the 'Application Workspace' for 'Kunj Modh' at 'Aalen University'. At the top, there's a progress bar with four steps: 1. Applicant (checked), 2. Application (active), 3. Document, and 4. Review. Below the progress bar, the breadcrumb trail reads 'Students / Kunj Modh / Aalen University'. The main section for 'Kunj Modh' shows 'Aalen University · Master of Science in Machine Learning and Data Analytics · Summer 2027'. The 'APPLICATION STATUS' is '✓ Applicant information ready', with a 'Generate Document →' button and a 'Review all information →' link. A 'Requirements status' box shows 'not found'. The 'Documents' section has a '+ Add Document' button and two entries: 'Visa SOP' (Not Started, Generate →, Delete) and 'Statement of Purpose' (Not Started, Generate →, Delete). Each document entry includes a description and tags for the template, type, and word count.

The Intake Wizard

Click **Complete N Missing Answers →** to start the wizard. It shows you one section at a time, only the required ones:

Students / Aalen University / Master's Motivation

Master's Motivation

Why pursue a master's in this field now?

Why do you want to pursue a master's degree in this specific field? *

I want to deepen my expertise in ML and Data Analytics to solve real-world problems at scale.

Why master's now?

After 2 years of industry experience, I have practical context for advanced coursework.

Knowledge/skill gaps you want to address

Advanced statistical learning, distributed ML systems, research methodology

Academic motivation

Want to work with leading researchers on real ML applications

Professional motivation

Goal is to become an ML Architect leading AI strategy

Expected learning

Advanced ML algorithms, MLOps at scale, research methodology

How master's supports career plans

Access to German tech industry and research labs

Skip for now

Save & Continue →

How the wizard works

Fill in each section and click **Save & Next Missing Answer →**. The wizard automatically takes you to the next missing section. When all required sections are done, you'll see "✓ All required information complete".

Upload a CV (Optional Shortcut)

Instead of filling in each section manually, you can upload the student's CV to auto-fill education, experience, projects, and skills:

The "Upload CV to pre-fill instead" link on the Application Workspace. Click it to open the upload area.

The screenshot shows the D-VIVID CONSULTANT application workspace. At the top, there's a logo for D-VIVID CONSULTANT and a 'Students' tab. Below the logo is a progress bar with four steps: 1. Applicant (checked), 2. Application (active), 3. Document, and 4. Review. The main section is titled 'Kunj Modh' and shows the application for 'Aalen University · Master of Science in Machine Learning and Data Analytics · Summer 2027'. The application status is 'Draft' and 'Delete application' is available. Below this, the 'APPLICATION STATUS' is '✓ Applicant information ready' with a 'Review all information →' link and a 'Generate Document →' button. A 'Requirements status' section shows 'not found'. The 'Documents' section has a '+ Add Document' button and two document entries: 'Visa SOP' and 'Statement of Purpose'. Each document entry shows a 'Not Started' status, a 'Generate →' button, and a 'Delete' button. The 'Visa SOP' document has a 'D-Vivid Template' and 'visa sop' tag, and the 'Statement of Purpose' document has a 'Consultant Provided' and 'statement of purpose' tag.

How it works

1. Click "Upload CV to pre-fill instead" on the application workspace
2. Choose a PDF, DOCX, or TXT file
3. The system extracts education, experience, projects, and skills
4. Review the extracted data before applying
5. Click "Apply" to fill the intake automatically

Important

CV upload is a shortcut — you should still review the extracted data for accuracy. The AI uses this information to write documents, so incorrect data leads to incorrect documents.

3 Create Documents

Once the intake is complete, the **+ Add Document** button appears at the bottom of the Documents section. Click it to open the creation form:

Add Document form — choose the document type, enter the prompt, and optionally add consultant instructions.

statement of purpose

800-1000 words

What to fill in

Field	Required?	Description
Document Type	Yes	SOP, Essay, Visa SOP, LOR, etc.
Prompt / Question	Depends on type	Paste the university's writing requirement. Required for SOP/Essay/Custom. Optional for Visa SOP (uses D-Vivid default).
Consultant Instruction	No	Guidance for the AI writer (e.g. "Keep it concise, focus on ML experience")
Word Min / Max	No	Word count limits for this document
Character / Page Limit	No	Additional length constraints
Mandatory Topics	No	One per line — topics the document must cover
Additional Questions	No	One per line — specific questions to address
Formatting Rules	No	e.g. "12pt font, 1.5 line spacing"

Key Point

Each document owns its own requirements. A Visa SOP will NOT inherit the SOP's prompt or word limits. Each document is completely independent — no cross-document bleed.

3a Generate a Document with AI

After creating a document, you'll see the Document Workspace. Click **Generate Document** to start the AI pipeline:

Document Workspace — the generation hub. Click "Generate Document" to start the 6-stage AI pipeline.

The screenshot shows the D-VIVID CONSULTANT Document Workspace. At the top, there's a header with the logo and a 'Students' tab. Below the header is a progress bar with four stages: Applicant (checked), Application (checked), Document (active, circled with '3'), and Review (4). Below the progress bar is a breadcrumb trail: Students / Kunj Modh / Aalen University / Statement of Purpose. The main content area has two sections. The first section is titled 'Statement of Purpose' with a 'Not Started' status. It shows the document title 'Aalen University · Master of Science in Machine Learning and Data Analytics · Master of Science' and a 'Delete document' link. The second section is titled 'Generate Document' with the instruction 'Generate a first draft using the AI pipeline.' It features a green box labeled 'Ready to generate' with three checkmarks: 'Applicant information', 'Prompt / instructions', and 'Requirements'. Below this is a large blue button labeled 'Generate Document'. At the bottom right, there is a 'Prompt & Instructions' section with a right-pointing arrow.

The 6 AI Stages

The AI pipeline runs 6 stages automatically. You'll see live progress:

#	Stage	What it does
1	Prepare (Planner)	Plans the document structure and selects relevant evidence from the student's approved facts
2	Write (Writer)	Writes the first draft using only approved student evidence — never invents facts
3	Review (Quality Reviewer)	Checks the draft for coverage, accuracy, and requirement compliance
4	Polish (Language Calibrator)	Refines language, tone, and readability
5	Finalize (Bounded Finalizer)	Combines all stages into the final document, filtering to only relevant evidence
6	Verify (Fact Reviewer)	Fact-checks every claim against the student's approved evidence ledger

What to expect

The pipeline typically takes 1-3 minutes. You'll see a progress bar with the current stage. You can cancel at any time. When complete, you'll see the word count, fact-check results, model used, and cost.

Important

The AI only uses approved student facts from the intake. It will NOT invent information. If facts are missing, it will leave gaps or use safe fallbacks — never fabricate.

3b Edit, Save Versions, and Approve

After generation, the document opens in a rich text editor:

Document Workspace — rich text editor with word count, prompt info panel, and export options on the right.

Editing

- Click in the editor and make changes — it's a full rich text editor
- The word count updates live at the bottom
- Click **Save Changes** to update the current version, or **Save as New Version** to create a new one

Version History

All versions are listed at the bottom. Each version shows who created it, the model used, cost, and word count:

✓ Prompt / instructions

✓ Requirements

Generate Document

Prompt & Instructions

Approving a Version

1. Select the version you want to approve in Version History
2. Click **Approve**
3. A confirmation dialog appears — click **Approve Document**

Tip

You can approve even if word count warnings appear. The consultant is the final authority. You can also approve a different version later.

4 Export the Final Document

Once a version is approved, the Export panel on the right side of the document workspace changes to show download buttons:

Export panel — after approval, green "Download PDF" and "Download DOCX" buttons appear. Draft exports are also available for non-approved versions.

The screenshot shows the D-VIVID CONSULTANT interface. At the top, there's a logo and a 'Students' tab. A progress bar indicates the current step is 'Document' (3), with previous steps 'Applicant' (1) and 'Application' (2) completed, and 'Review' (4) pending. Below the progress bar, the document title 'Statement of Purpose' is shown with a 'Not Started' status. The document content area includes a 'Generate Document' button and a list of requirements: 'Ready to generate', 'Applicant information', 'Prompt / instructions', and 'Requirements'. A 'Delete document' link is also visible.

Button	What it does
Download PDF (green)	Exports the approved version as PDF
Download DOCX (green)	Exports the approved version as DOCX
Draft PDF	Exports the currently selected version (even if not approved)
Draft DOCX	Exports the currently selected version as DOCX

File download

The file downloads to your computer automatically. The filename includes the document title and version number.

Managing Multiple Documents

One application can have many documents. Each is independent with its own prompt, word limits, topics, and formatting:

Application Workspace with multiple documents — each card shows the title, type, prompt source, word limits, and status. The + Add Document button is always visible at the bottom.

The screenshot displays the D-VIVID CONSULTANT application workspace. At the top, the logo and 'Students' tab are visible. A progress bar shows four steps: Applicant (completed), Application (active), Document, and Review. Below the progress bar, the breadcrumb 'Students / Kunj Modh / Aalen University' is shown. The main section for 'Kunj Modh' (Aalen University · Master of Science in Machine Learning and Data Analytics · Summer 2027) includes a 'Draft' status, a 'Delete application' link, and an 'APPLICATION STATUS' section indicating 'Applicant information ready' with a 'Generate Document →' button and a 'Review all information →' link. Below this, a 'Requirements status not found' message is displayed. The 'Documents' section at the bottom features a '+ Add Document' button and two document cards. The first card, 'Visa SOP', has a 'Not Started' status, a 'Generate →' button, and a 'Delete' link. The second card, 'Statement of Purpose', also has a 'Not Started' status, a 'Generate →' button, and a 'Delete' link. Each document card includes a prompt, a 'D-Vivid Template' tag, a topic tag, and a word limit.

Key Points

- You can have **multiple documents of the same type** (e.g., two Essays, two LORs)
- Each document has its **own prompt, word limits, topics, and formatting**
- A Visa SOP will **NOT** inherit the SOP's prompt — each document is isolated
- The **+ Add Document** button is always visible at the bottom of the Documents section

Document Card Status Indicators

Status	Meaning	Action
NOT_STARTED	Document created, not yet generated	Generate →
GENERATING	AI pipeline in progress	Open to view progress
GENERATED	AI draft created, not yet reviewed	Review →
DRAFT	Saved but not approved	Review →
APPROVED	Final version approved	Export / Open →
FAILED	Generation failed	Retry →

Visa SOP document — a second document type showing independent requirements. Uses the D-Vivid default template.

Prompt & Instructions

▶

Deleting Documents and Applications

Delete a Single Document

On each document card, click **Delete** (small red text, bottom right). A confirmation panel appears:

Delete confirmation

"Delete 'Visa SOP'? This will permanently delete this document, its generated versions, and its generation history. Other documents and the application will not be affected."

- Only the selected document is deleted — by document ID, never by type
- Other documents are untouched
- The application and student remain
- You cannot delete a document while generation is in progress

Delete an Application

On the application workspace, click **Delete application**. This deletes the application and ALL its documents, versions, and generation history. The student profile remains.

Delete a Student

On the Students list, click **Delete** on a student row. This deletes the student, their profile, and ALL applications with their documents and generation history. This cannot be undone.

Warning

Deletions are permanent. There is no undo for any delete operation. Always confirm the confirmation dialog before proceeding.

Document Types Reference

The portal supports 11 document types. Each has different prompt requirements:

Type	Prompt Required?	Use Case
Statement of Purpose	Yes	Standard SOP for university applications
Essay	Yes	Application essays with specific questions
Supplemental Question	Yes	Short supplemental essay responses
MOA	Yes	Memorandum of Agreement
Personal Statement	Yes	Personal narrative statement
Statement of Academic Purpose	Yes	Academic-focused purpose statement
Letter of Motivation	Yes	Motivation letter for European universities
Visa SOP	No (uses D-Vivid default)	Student visa statement of purpose
Cover Letter	No (uses D-Vivid default)	Job/program cover letter
Letter of Recommendation	No (uses D-Vivid default)	LOR from faculty/recommender
Custom Document	Yes	Any other document type

Visa SOP

If you leave the Visa SOP prompt blank, the system uses the D-Vivid default template. This template focuses on study purpose, career relevance, and post-study intentions — it does NOT force family/property/finance claims.

The 9 Intake Sections Reference

The intake has 9 sections. Only 6 are required to unlock document generation:

#	Section	Required?	What it collects
1	Student Details	Yes	Name, email, phone, nationality, country, education history
2	Field Motivation	No	Why the student chose this field
3	Academics & Projects	Yes	Projects, subjects, skills (technical, tools, programming, domain, soft)
4	Work Experience	Yes	Jobs, internships, research roles (or "no work experience" checkbox)
5	Master's Motivation	Yes	Why pursue a master's now, skill gaps, academic/professional motivation
6	Country Questions	Yes	Why this country, post-study plans (country-specific questionnaire)
7	Subject Requirements	No	Consultant-added notes about program prerequisites
8	Program / University Info	No	Official source URL for program context
9	Career Goals	Yes	Short-term role/industry + long-term vision/goals

Required sections

Sections 1, 3, 4, 5, 6, and 9 must be complete to unlock document generation. Sections 2, 7, and 8 are optional and can be skipped.

The 6 AI Generation Stages

The AI pipeline runs 6 stages in sequence. Each stage has a specific role:

Stage	Name	What it does
1	Prepare (Planner)	Plans the document structure and selects relevant evidence from the student's approved facts
2	Write (Writer)	Writes the first draft using only approved student evidence — never invents facts
3	Review (Quality Reviewer)	Checks the draft for coverage, accuracy, and requirement compliance
4	Polish (Language Calibrator)	Refines language, tone, and readability
5	Finalize (Bounded Finalizer)	Combines all stages into the final document, filtering to only relevant evidence
6	Verify (Fact Reviewer)	Fact-checks every claim against the student's approved evidence ledger

Evidence-constrained writing

The AI only uses facts that the consultant has approved in the intake. It will never fabricate education, experience, projects, or personal details. If information is missing, it leaves a gap rather than inventing.

15. Troubleshooting

"I can't generate a document"

Cause: The intake is not complete.

Fix: Go back to the application workspace and click **Complete N Missing Answers** →. Fill in all required sections (Student Details, Academics & Projects, Work Experience, Master's Motivation, Country Questions, Career Goals).

"The generation is stuck"

Cause: The AI pipeline may have timed out or the server is processing.

Fix: Wait 2-3 minutes. If the progress card shows "Generation appears interrupted", click **Check Again**. If it's still stuck, click **Cancel Generation** and try again.

"The generated document has gaps or says information is missing"

Cause: The AI only uses approved student facts. If the intake is incomplete, it won't invent information.

Fix: Go back to the intake and complete the missing sections. Then regenerate.

"I see 'DOCUMENT_GENERATION_IN_PROGRESS' when trying to delete"

Cause: You can't delete a document while the AI is generating it.

Fix: Wait for generation to complete or cancel it first, then delete.

"The word count warning appears"

Cause: The document is outside the word limit range.

Fix: This is an advisory warning only. You can still approve and export. Edit the document to adjust the word count if needed.

"I want to create another document of the same type (e.g., a second Essay)"

Yes, this is supported. Click **+ Add Document**, select the same type, and give it a different title. Each document is independent with its own prompt and requirements.

Quick Reference

1. Students → + New Applicant
2. Complete intake (required sections only)
3. + Add Document → choose type → enter prompt
4. Generate Document → wait for 6 stages
5. Edit in the rich text editor → Save as New Version
6. Approve the final version
7. Download PDF or DOCX
